Fund Sub-Advisor

Brandes Investment Partners ("Brandes") is an independently owned firm. Brandes uses a team approach for the management of the Emerging Markets Fund, with each member of the team assuming specific responsibilities.

Objective

The Fund's objective is long-term growth of capital. The Fund seeks to achieve its objectives by investing primarily in companies domiciled, or headquartered, around the globe in the emerging markets or emerging economies. Emerging markets or emerging economies are nation's with social or business activity in the process of rapid growth and industrialization. ¹¹

Strategy

The Fund uses the principles of value investing to analyze and select equity securities for the Fund's investment portfolio. When buying equity securities, the Investment Manager assesses the estimated "intrinsic" value of a company based on data such as a company's earnings power, cash flow generation, and/or asset value of the underlying business. By choosing securities that are selling at a discount to the Investment Manager's estimates of their share of the company's intrinsic business value, the Investment Manager seeks to establish an opportunity for long-term capital appreciation. The Investment Manager may sell a security when its price reaches a target set by the Investment Manager, if the Investment Manager believes that other investments are more attractive, or for other reasons.
