3 Reasons to Invest with Timothy Plan

Almost anyone can devote even a little money to investing, and the sooner you start investing, the more your investment has the potential to grow. Most investors realize this, but often the more difficult question becomes, “where should you invest?”
Advantages

Professionally Managed
The portfolio managers we employ have developed advanced skills through experience or specialized education that helps them in making investment predictions and decisions.

Convenience
Most investors don’t have the time or expertise to manage their investments. Our portfolio managers dedicate their professional lives to research and analysis of fund holdings on a daily basis.

Affordability and Liquidity
Investors can start with a relatively small amount of money and have the option to buy or redeem shares on any business day.

Well Regulated and Transparent
Compared to some other investments, mutual funds are highly regulated and offer transparency in their business practices.

Flexibility
Mutual funds offer a variety of investment options (e.g., fixed income, balanced, growth, sector, and global). Some of these options provide an emphasis on generating regular income for an investor, while other options look for long-term growth.

Minimum Paperwork
Gains/losses, dividends, and income earnings are calculated and provided to the investor on a quarterly basis.

Diversified Investment Strategies
Our thirteen funds offer the opportunity for a diversified investment strategy across five asset classes.

Stewardship

What will it profit a man if he gains the whole world and forfeits his soul? (Matt. 16:26)

The way we invest not only affects our financial goals, but it affects the broader culture. When we choose to invest in any security, we become owners in a company and help support (financially) the mission and vision of that company. Timothy Plan allows you to invest in companies whose products and practices bring real blessing to the broader culture. We believe this is a better kind of investing.

Investing in a mutual fund may result in a loss of principal. Carefully consider the investment objectives, risks, charges, and expenses before investing. A prospectus is available from the Fund or your financial professional that contains this and other more complete, important information. Please read it carefully before investing or sending money.
